Hints On Home Canning

"With the rationing of processed food and the amazing response to the Government's request for victory gardens, there will be a great increase in the amount of food conserved in the home. Canning is the most popular food conservation method but drying, dry salting, pickling and brining are other recommended methods," says Dr. L. C. Riggin, State Health Commissioner.

"The methods of canning used in the home are not usually as efficient as those in commercial canneries, as the highly specialized equipment used in canneries is not available to the average housewife. When canning at home, therefore, it is important to remember that 'trouble-making' organisms can develop in carelessly processed foods. Some of these germs may only spoil food, but others may cause serious illness and death if only a small portion of the poisoned food is consumed.

"One of the dangerous bacteria is the botulinus, his germ produces spores which in turn produce a toxin or poison in food. Cases of botulism have been traced to foods that were inadequately processed during canning. If a food is sufficiently acid, the botulinus may be destroyed by processing at 212 degrees F. With non-acid vegetables, such as beans, peas and corn, as well as meats the steam pressure cooker is recommended.

"The addition of small amounts of acid, such as vinegar or lemon juice, is not advised, as it does not sufficiently change the acidity of food to make much difference in the keeping qualities. The use of chemical preservatives such as salicylic acid, sodium benzoate and 'canning powders' should be avoided in canning any kind of food. These chemicals are harmful to the human system sometimes. The only safe way is to process foods properly with the correct amount of heat.

"All home canned foods should be examined very carefully before using. Tin cans may bulge or the seals on jars may break due to the accumulation of gas. A bad odor or softening and darkening of canned food calls for its destruction. Moreover, if there is any doubt about the condition of food, it should be destroyed.

Back To The Dairy Farms

Virginia Selective Service boards have been told to return men with experience to dairy farms. The program includes persuading 4-F men between 18 and 45 with experience to return to dairy farms if they are not in an essential activity, and getting men over 45, not engaged in essential activity, to go back to dairy farming. In addition, the local boards have been authorized to give men 18 to 45 thirty days to get into agriculture or another essential activity, as otherwise they will be classified as available for military service.

TRACTOR TIRES

A plan to assist farmers in their wartime food production will provide rubber tires and tubes for converting approximately 20,000 tractors and implements, originally equipped with steel wheels, which have been bought since May 1, 1942. Local War Price and Rationing Boards in the State will now authorize conversions after certification of farmers' applications by USDA War Boards. Reasons for certification are the necessity of moving the machine over the road from farm to farm, or the fact that the soil or terrain is such that the machine is seriously handicapped by not having rubber tires.

A single night raid of 1,000 bombers over the Rhineland calls for $375,000 worth of gasoline, plus a million dollars for bombs dropped, and an average of 11 million dollars as the cost of planes lost through enemy action.

SEED POTATOES IN BULK

Virginia retailers are now permitted to sell seed potatoes in any quantity for planting purposes only. The former requirements that they be sold only in lots of 50 pounds, or more, has been removed by the State OPA.

Through U. S. Army measures for conserving rubber, the use of wide rubber in war materials has been reduced by 45 per cent, and at many posts, camps, and stations animal-drawn vehicles are used in certain jobs to save tires.

"A SLIP OF THE LIP"

All the resources of the State Office of Civilian Defense are being utilized to impress upon every resident of the State the high importance of permitting no "bits and pieces" of war information to reach enemy ears though careless talk. The OCD says that a casual remark about a son or brother leaving to join his ship may be the line the enemy needs to tip off a U-boat.

RETURN UNUSED COUPONS

Unused gasoline ration coupons and books which are no longer valid are the property of the Government and must be turned in within five days after the close of the period of validity. Also, the ODT is asking holders of unused quarter "T" coupons, which have not expired, to turn them in immediately to their local rationing boards. Another point which the three district ODT offices in th State want to emphasize is sold or transferred, the original owner's "T" rations are not transferred with it. The new owner must secure rations for the vehicle himself.

PEAS AND BEANS

The average Virginian this year will have about 8 pounds of dry beans or 90 per cent of his usual supply, and nearly one pound of dry peas, or about 75 per cent. For the nation, this is about one pound of beans per capita than expected for this year at the time beans and peas were added to the list of rationed foods. OPA has explained that 55 per cent of dry edible beans and 60 per cent beans and 40 per cent of dry peas and split peas are to be reserved for military needs and the use of our allies.

The goal of the Second War Loan drive is 13 billion dollars. That is just about one fifth of the estimated increase of the Public Debt for the fiscal year of 1943.

SPUDS SCARCE

Due to its recent scarcity, the lowly potat moves into the limelight For the last week or so many Virginia retailers have had difficulty in finding white potatoes and dry onions. A plea in every home of grocery stores, OPA's action last week in increasing the maximum price of the late 1942 crops for sales during May and June to 10 cents above those of April, will probably remedy the scarce situation. This action will spread the available supplies evenly over the next three months, and will, at the same time, mean a more even distribution of available supplies.

The Milwaukee Railroad has offered its 35,000 employees the use of suitable vacant land for Victory Gardens.

Ten to 15 per cent of Georgia's 1942 bumper crop of cotton was picked by volunteer city folks.

Seniors of a Milwaukee high school used the money saved to buy class rings to purchase war stamps.

Thirty-seven employee suggestions for improving war production will save war plants 176,000 man hours annually.

Equipped with new American machinery, India is producing as much gun ammunition in ... months as she produced in a year prior to the war.

PASS THE "SECONDS"

New tires and tubes which have been reconditioned are now sold under separate maximum wholesale and retail prices set by OPA. The new prices are based on discounts of 20 per cent from the maximum price for perfect truck tires and tubes and 25 per cent for other types.

Jamican Workers Imported

About 10,000 agricultural workers will be imported from Jamica to relieve the farm labor shortage in critical areas in the U. S. through an agreement between the two governments. The Jamican worker will not displace U. S. farm laborers, nor reduce established wage rates. Health authorities will check physical fitness of workers, and when their contracts expire, they will be returned to Jamica. Similar agreements have been made with Mexico and the Bahama Islands.

BINDER TWICE PRICE UP

Binder twine prices will be some what higher this year because of the increased cost of materials, the War Production Board in Richmond says. Cordage and twine fibers, from which binder twine has been made for years, are scarce, as WPB and the Department if Agriculture are encouraging use if part cotton yarn combined with henequin and sisal. These fibers are more expensive than materials formerly used.

THE OLD JUDGE SAYS..

Sure been a great year for crops, Judge... best we've had in quite a spell."

"That's true, Henry... all over the country. As a matter of fact, there's been quite a surplus supply of grain according to some figures I saw in one of your farm papers the other day. But that surplus is being used to mighty good advantage and is making the contribution of you farmers to the war effort more important than ever.

"Here's just one example of what I mean The beverage distilling industry alone will use 100,000,000 bushels of this surplus to make alcohol seriously needed by the government for gunpowder, synthetic rubber chemicals and medical supplies.

DON'T HAVE FALSE HOPES

One of the greatest of all mistakes is to kid oneself! Many of our readers may have hurriedly jumped to the conclusion that the successful ending of the African campaign would mean that the war might end this summer. It would be nothing short of a miracle if such would be the case. Even were all Italy over-run, it must be remembered that Italy was on our side in the past war, and so was France, and so was Rumania!

MRS. J. W. GROW

The Milwaukee Railroad has offered its 35,000 employees the use of suitable vacant land for Victory Gardens.

Thirty-seven employee suggestions for improving war production will save war plants 176,000 man hours annually.

Equipped with new American machinery, India is producing as much gun ammunition in ... month as she produced in a year prior to the war.

Four questions every American should ask himself

1. HOW CAN I HELP WIN THE WAR?
2. HOW CAN I KEEP THE COST OF LIVING DOWN?
3. HOW CAN I BE SURE TO HAVE SOME MONEY TO TIDE ME OVER THE PERIOD OF READJUSTMENT WHEN THE WAR IS WON?
4. HOW CAN I GET $4 FOR $3?

An answer to all four questions is: BUY WAR BONDS through the Payroll Savings Plan.

The more bonds you buy, the more quickly we can win the war.

The more bonds you buy, the more you reduce the possibility of a rising cost of living.

The more bonds you buy now, the more money you will have when the war is won.

The more bonds you buy, the more *four dollars* you'll get for *three!*

Put at least 10%—not 6%, or 7%, or even 9%, but 10%—of your earnings into War Bonds. Do it through your company. Twenty-one million Americans are doing it now. Let's make it at least 10% for *every* American!

WHAT YOU SHOULD DO

If you are . . .

1. Already setting aside 10% of your pay in War Bonds through the Payroll Savings Plan—boost that 10% if you can.
2. Working in a plant where the Plan is installed, but haven't signed up yet—sign up tomorrow.
3. Working in a plant where the Payroll Savings Plan hasn't been installed, talk to your union head, foreman, or plant manager—and see if it can't be installed right away. The local bank will be glad to help.
4. Unable to get in on the Payroll Savings Plan for any reason, go to your local bank. They will be glad to help you start a Plan of your own.
